

# Bibliographical Index

## BIBLIOGRAPHICAL ACCESS TO THIS VOLUME

Two modes of access to bibliographical information are used in this volume: the footnotes and the Bibliographical Index.

The footnotes provide the full form of a reference the first time it is cited in each chapter, with short-title versions in subsequent citations. In each of the short-title references, the note number of the fully cited work is given in parentheses.

The Bibliographical Index comprises a complete list, arranged alphabetically by author's name, of all works cited in the footnotes, appendixes, and figure legends. Numbers in bold type indicate the pages on which references to these works can be found. This index is divided into two parts. The first part identifies the editions and translations of texts; the second part lists the modern literature.
